

## 8 Manufactured Home Decor Ideas To Help Your Home Seem Bigger

Your manufactured home is your pride and joy, and you can't wait to fill it with all the amazing decorating ideas that are rolling around in your mind. Based on the floor plan you have selected. You may have limited space, and you don't want clutter. There are many ways that you can decorate for efficiency as well as style, incorporating the ideas that you love without sacrificing one square inch of space for something unnecessary.

You can use decor that works to open the area and make your home feel bigger and more spacious. Here are 8 great manufactured home decor ideas to help you:

### Paint it Bright!

Painting the walls is how almost every manufactured home decor project begins. Okay, maybe eggshell white is not the most appealing option to you, but there are other bright colors that you can choose for your new abode, that will reflect light and make your space feel open and airy. Try using different shades in different areas to create the illusion of new rooms where there are no walls.

### Multifunctional Windows

Wall space may be limited but windows provide more than sunlight and a view. They bring in air and sun as well, which are essential for growing plants. Plant a small herb garden in a window box and hang it inside the house, near the kitchen. When you need herbs and spices for cooking, you can pick them right from your garden without having to go outside.

### Art Isn't Useless

Pictures in frames and works of art may seem like a waste of space, even if you love seeing them on your walls. This does not have to be the case. Hang pictures or artwork on cabinet doors. Your cabinets will be cleverly concealed, and you can have the pictures that you love. If you're handy with a paintbrush and you don't want to conceal your cabinets, you can paint murals directly on the doors.

### Make Your Furniture Work

A manufactured home décor project provides a lot of opportunities for original design. Your space can be catered to work specifically for you. Find someone who can make you custom furniture or make it on your own if you can. Imagine a bed that floats up into the ceiling on a track in the morning and a table that folds out of the wall behind the bed. Maybe a kitchen table with leaves, that will turn it into your ideal laptop computer workstation. The possibilities are endless.

### Stack it Up

The sky is the limit....or maybe the ceiling. Stack appliances in cubbyholes that stabilize them. Stack entertainment center components recessed into a wall. Your vertical space is available, so don't forget about it!

### Take it Outside

If you ever really feel like you're getting a bit cramped or you have friends over and you just all can't fit, utilize your yard if you have one. Manufactured home décor doesn't end inside. If you have a yard, you have room to spare. Make this space your sanctuary. Plant a garden or add some custom furniture that matches the inside.

## Great Decorating Ideas for Mobile Homes:

Use a light wall color throughout the entire home to open the space up and create cohesiveness.

Make your furniture work double-time with multipurpose pieces – stools as tables, benches with storage, etc.

Use wasted space in your home for storage.

Use a high-gloss white for the ceilings so the light will reflect well and help make the ceilings appear taller.

Mirrors help make a space seem larger and your ceilings appear taller- use them!

Go Up! Use the vertical space in your home. Stacked washer and dryers take up a lot less room than side-by-side appliances. Bookshelves on the walls can make a beautiful display area.

Pay attention to detail. In small spaces, every little detail counts. Trim and accents that pull the space together can update a room quickly.

Extend the living space to the outdoors – decks, patios, and porches are perfect outdoor living spaces – use them to your advantage.

Control Clutter. The less you have, the less you have to clean or store. Make a goal to donate one item for every new item you bring in.

Use Pattern and Texture. Many designers have stated that patterns and textures work wonders to add pizzazz to your home.

Hang artwork higher to help make your ceilings appear higher. Full-length curtains work, too.

Use moderately scaled furniture – scale can make or break a room. Buy furniture that isn't too big or too small, but don't be scared to have one or two large pieces that are functional.

Mobile homes are rectangle so add as many curvy or circular pieces as you can in your home. It will break up the straight lines.

Keep the furniture off the walls. Create cozy, intimate seating arrangements instead.

Use bookshelves as room dividers.

Forget about all the rules, advice, and tips. Take them into consideration, sure, but it's your home and your space – make it yours!
