

Lemon Grass

An Herb that grows up to four feet tall and three feet wide and contains citronella, a natural oil that mosquitoes cannot stand. Lemongrass is also often used to cook for flavor. Any plant carrying the citronella oil is sure to ward of the bite of a mosquito.

Scented Geraniums

Citrosa geraniums (citronella plant) produces a citrus scent that mimics citronella smells. The strong smell the geranium sets off is what repels the mosquito.

Lavender

Lavender will keep moths, fleas, mosquitoes, and flies away. These insects can't stand the sweet scent that emits from the plant. Plant lavender by your front door or bundle bouquets of it in your home to keep these bugs from getting into your house. It thrives in a hot, dry, sunny environment.
